

MUHAMMAD HASSAN ALI

Full Stack Developer | AI Prompt Engineer | Web Dev Educator

ABOUT ME

My name is Muhammad Hassan Ali, and I completed my BS in Computer Science from Lahore Garrison University. I am a Full Stack Developer, where I design and build complete web applications from front-end interfaces to back-end systems with a focus on clean code and real-world functionality. Alongside development, I work as a Web Development Instructor, teaching students how to build websites from coding and breaking down complex concepts into simple lessons. I am also an AI Prompt Engineer, crafting effective prompts to get the best results from AI models and working on AI-driven projects to build smarter, more efficient solutions. Combining development, teaching, and AI has allowed me to solve problems from multiple angles, and I remain passionate about continuous learning and using my skills to create meaningful impact through code, teaching, and innovation.

EDUCATION

Bachelor of Science in Computer Science | 2022-2026

Completed BSCS from Lahore Garrison University, gaining strong knowledge in software development, programming, databases, and modern web technologies along with practical project experience.

Intermediate in Computer Science (ICS) | 2020-2022

Completed Intermediate from MAO Collage along with gaining basic teaching experience and developing strong communication and student-handling skills.

Matriculation in Computer Science | 2018-2020

Completed Matriculation from Allied School where I built a strong academic foundation and developed an early interest in technology and learning.

WORK EXPERIENCE

Web Development Internship NovaStack Hub | July 2026 – Present

During my internship at NovaStack Hub, I contributed to building and maintaining responsive, user-focused websites, collaborating closely with the development team to enhance UI and resolve technical issues. This hands-on experience sharpened my problem-solving skills and gave me real exposure to industry-standard development workflows and version control practices.

Web Educator Unique Science Academy | August 2025 to february 2026

Even before formal schooling shaped my path, I was already diving into technology training in Web Development, Python, and Artificial Intelligence at right from Matriculation through Intermediate level. This early, hands-on exposure ignited my passion for tech and laid the foundation for everything I do today as a developer and AI enthusiast.

CONTACT

- +92 314-0686192
- Rizvi2u12@gmail.com
- <https://www.linkedin.com/in/muhammadd-hassan-ali-261053419>
- portfolio-swart-three-pxdtq1xoen.vercel.app

SKILLS

- HTML5, CSS3, JavaScript
- React.js
- Tailwind CSS / Bootstrap
- Responsive Web Design
- Node.js
- Express.js
- RESTful API Development
- MySQL
- MongoDB
- Git & GitHub
- Postman (API Testing)
- Python
- Firebase
- UI/UX Design
- Prompt Optimization for Accuracy & Efficiency
- Problem-Solving & Critical Thinking
- Self-Motivated & Proactive
- Work Ethic & Reliability

Computer Instructor Learning Grammer School | August 2025 to September 2025

Taught comprehensive computer courses covering MS Word, MS Excel, MS PowerPoint, and fundamental computer operations, helping students build strong office productivity and computer literacy skills. This teaching experience strengthened my communication, patience, and ability to simplify technical concepts for learners of all levels.

Full Stack Developer Internship skillifyzone | October 2025 to November 2025

During my internship at Skillifyzone, I worked across the full development stack using HTML, CSS, JavaScript, React.js, Node.js, and MySQL building responsive front-end interfaces and efficient back-end logic for real-world web applications. I collaborated with the development team, followed industry-standard coding practices, and strengthened my problem-solving skills under real deadlines solidifying my passion for full stack development.

Sale | Purchase Defence Medical Group | july 2019 to March 2022

Worked in sales and purchase operations using Abuzar Software, managing inventory records, billing, and daily transaction entries. Gained experience in software-based data handling and basic business operations.

PROJECTS

**AI-Powered Web Application with Custom Chatbot Integration
Final Year Project (FYP)**

Designed and developed a full stack web application using React.js, Node.js, Express.js, MongoDB, and Firebase, featuring a self-built AI chatbot powered by Groq API integration for fast, real-time conversational responses. This project reflects strong expertise in merging full stack development with practical AI implementation to build complete, production-ready solutions.

ShopSphere – Full Stack E-Commerce Platform

Developed a full-featured e-commerce web application using React.js, Node.js, Express.js, and MongoDB, enabling users to browse products, manage carts, and complete secure transactions. Integrated Stripe and JazzCash payment gateways to support seamless local and international payment processing. The platform includes user authentication, product management, order tracking, and a responsive, user-friendly interface reflecting strong full stack development skills from database design to front-end experience.

LANGUAGES

- English – Fluent
- Urdu – Native
- Punjabi – Fluent
- Arabic – Basic

CERTIFICATION

**Full Stack Web Application Development
Skillifyzone**

Completed a certification in Full Stack Web Application Development from Skillifyzone, gaining practical, hands-on training in building complete web applications covering both front-end and back-end development, database integration, and modern development workflows

Interests

- Learning new web technologies and frameworks
- Building innovative web applications and side projects
- UI/UX design and creating user-friendly interfaces
- Contributing to open-source web development projects
- Problem-solving and logical thinking in coding challenges
- Teaching and sharing web development knowledge with others
- Exploring AI integration in modern web applications
